

Blanchet Joins Nano Terra

May 20, 2009 09:57 AM

Graciela Blanchet, a specialist in the field of organic electronics, has been named chief technology officer at [Nano Terra Inc.](#), a Cambridge-based company focused on surface engineering and nanotechnology development.

Blanchet joins Nano Terra from DuPont, where she was a fellow in the central research department, Nano Terra said in a press release.

[George Whitesides](#), Nano Terra's chairman and head of its scientific advisory board, said in a statement: "It is an exciting opportunity for Nano Terra to have a talent of Graciela's caliber on board. Her deep experience in printed electronics, material sciences, and physics match very well with the company's core scientific competencies."

The photo of Blanchet that accompanies this post was provided by the company.
